118th Workshop on high-resolution respirometry

2017 February 07-08
Hyderabad, IN

Venue:

The Centre for Cellular & Molecular Biology (CCMB)
Uppal Road, Hyderabad
500007, AP, India

Host:

Kumarasamy Thangaraj, Prof., PhD
The Centre for Cellular & Molecular Biology (CCMB)
Evolutionary and Medical Genetics Laboratory
Centre for Cellular and Molecular Biology
thangs@ccmb.res.in

Rajan Kumar Jha, PhD student - rajanmonuj@gmail.com
The Centre for Cellular & Molecular Biology (CCMB)

The 118th O2k-Workshop on high-resolution respirometry is held in cooperation with the O2k-Network Lab at **The Centre for Cellular & Molecular Biology (CCMB)**. This O2k-Workshop presents a basic introduction to the **OROBOROS Oxygraph-2k (O2k)** with integrated real-time data analysis. We introduce the new software **DatLab 7** and the concept of a quality control system including the MitoFit interlaboratory proficiency test.

HRR provides information on cell respiration with basic coupling control protocols. State-of-the-art OXPHOS analysis is extended using mt-preparations (permeabilized muscle fibres, tissue homogenate, isolated mitochondria), to evaluate coupling efficiencies and OXPHOS capacities with electron transfer into the Q-junction converging from NADH, FADH₂, succinate and α-glycerophosphate (N,F,S,Gp), to diagnose defects in respiratory electron transfer system pathways and the phosphorylation system. Novel developments are presented on **substrate-uncoupler-inhibitor titration (SUIT) protocols** in HRR. Mitochondria and cell research with the O2k provides the basis for a global network connected by the O2k-technology. The quality control system presented for high-resolution respirometry provides an important milestone on the way to much broader goals.

This O2k-Workshop takes place prior to [SMRM2017 in New Delhi, IN](#).

A separate registration is required. <http://www.smrm2017.com/>

Programme

1 Tuesday, Feb 07

*printed in workshop materials

Workshop Day 1	Weblink
09:00 Registration	
09:30-09:45 A welcome by Prof. Kumarasamy Thangaraj and OROBOROS INSTRUMENTS	
09:45-10:00 Introduction of participants and their research interests	IOC118
10:00-11:00 Get started with the O2k: Overview with video clips.	O2k-Manual
11:00 Coffee/tea break	
11:30-13:00 Principles of high-resolution respirometry: From switching on the O2k to the experimental result – oxygen sensor calibration and quality control.	POS-calibration-SOP
13:00 Lunch	
14:00-15:30 Comprehensive OXPHOS analysis: substrate-uncoupler-inhibitor titration (SUIT) protocols for respiratory control by coupling and mitochondrial pathways, SUIT reference assay.	The Blue Book* SUIT reference protocol
15:30 Coffee/tea break	
16:00-18:00 Demo-Experiment: High-resolution respirometry with freeze-dried yeast.	Yeast: HRR Reference Assay

2 Wednesday, Feb 08

Workshop Day 2	Weblink
08:30-11:00 Demo-Experiment	
11:00 Coffee break	
11:30-13:00 HRR experiments – discussion of conceptual and technical details and Hands-on data analysis	
13:00 Lunch	
14:00-15:30 Technical support and open innovation	Technical support
15:30 Coffee break	
16:00-17:00 Q&A session on HRR and OXPHOS analysis: Design of SUIT protocols experimental protocols	
17:00-17:30 The Bioblast wiki, O2k-Network and MITOEAGLE - feedback & conclusions	MITOEAGLE
17:30-19:30 Farewell activity
